EXAMINER

GELLNER, JEFFREY L

ART UNIT

PAPER NUMBER

3643

DATE MAILED: 12/29/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/706,341

Applicant(s)

GROTT, GERALD J.

Examiner

Jeffrey L. Gellner

Art Unit

3643

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 4-6 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 4-6 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informality:

The “RELATED APPLICATIONS” section should be updated to show that 09/849,453 is ^{now} ~~not~~ US 6,651,383.

Appropriate correction is required.

Claim Rejections - 35 USC §103

The following is a quotation of 35 U.S.C. §103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are is rejected under 35 U.S.C. §103(a) as being unpatentable over McManus (AWWA Annual Conf., 1997) in view of Thorborg (US 3,617,554) in further view of Mukhopadhyay (WO 98/06483).

As to Claim 4, McManus discloses a method of using aqueous effluent (page 441, 1st para.) comprising collecting water contaminated with Na or Ca or Cl salts (inherent in “agricultural wastewater” of page 441, 1st para.) and using in a cooling tower it dissipate heat (page 441, 1st para.). Not disclosed is processing the contaminated water into a first effluent of clean water and second effluent of wastewater, the first effluent having a salt content too high for potable use but lower than the contaminated water, the second effluent having 0.15% or more by

Art Unit: 3643

weight of salts; and analyzing the clean water to determine if its sodium content is too high for potable use. Thorborg, however, discloses separating waste water into two effluents (col. 2 lines 11-57, Figure), the first effluent having a salt content lower than the contaminated water (from title of “Desalting and purifying water by continuous ion exchange”), the second effluent having a having 0.15% or more by weight of salts (from fact that this effluent has increase in salt content); and, Mukhopadhyay discloses analyzing the clean water to determine if its sodium content is too high for potable use (from Table 1 on page 40 where salt concentrations are given which must come from chemical analysis of the water). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method of McManus by separating waste water into two effluents (col. 1 lines 38-44), the first effluent having a salt content lower than the contaminated water, and the second effluent having a having 0.15% or more by weight of salts so as to use an efficient and effective system; to analyze the water as disclosed by Mukhopadhyay so as to know if the system is working and how effectively; and, to have the first effluent with a salt content too high for potable so as to use the system in an economically efficient and effect manner by “cleaning” the water to only the level needed for its use.

As to Claim 5, McManus as modified by Thorborg and Mukhopadhyay further disclose a step of water softening (3rd para of page 441 of McManus).

As to Claim 6, McManus as modified by Thorborg and Mukhopadhyay further disclose the use of precipitation (inherent in “line/soda softening” of 3rd para. of page 441 of McManus).

Response to Arguments

Applicant's arguments with respect to claims 4-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey L. Gellner whose telephone number is 571.272.6887. The examiner can normally be reached on Monday-Friday, 8:30-4:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on 571.272.6891. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
